Industrial Flooring Solutions

NITOFLOR® FC150 HP

Chemically resistant, solvent-free epoxy coating applied to concrete floors to protect against chemical attack and vehicular traffic. Achieves defined slip resistance levels.

Typical Applications

Food production floors, chemical processing floors, hospital floors, kitchen floors, school floors, laboratory floors.

Colour Requirements

Colour pots required: 2 packs per 8L

AS 2700 colours factory tinted colour available in 16L pots (Min order required)

Sizes: 8L, 16L Pack

NITOFLOR® FC150 HP-FC

Fast cure, chemically resistant, solvent-free, epoxy coating applied to concrete floors to protect against chemical attack and vehicular traffic.

Typical Applications

Chemical processing floors, hospital floors, kitchen floors, school floors, laboratory floors.

Sizes: 4L Pack

NITOFLO[®]R SL

Self smoothing epoxy resin floor topping (2-4mm thickness).

Typical Applications

Hospital clean rooms, laboratory floors, food processing floors, film studio floors, prison floors, light industrial floors, supermarket floors.

Sizes: 16L Pack

NITOFLO[®]R SLX

Self smoothing epoxy resin floor topping for cold weather applications (2-4mm thickness).

Typical Applications

Hospital clean rooms, laboratory floors, food processing floors, film studio floors, prison floors, light industrial floors, supermarket floors.

Sizes: 16L Pack

CEMTOP® GP ADVANCED

High performance, self smoothing levelling mortar applied as an underlayment under carpet and tiles (2-50mm thicknesses).

Typical Applications

Office floors, retail floors, commercial floors, residential floors.

Sizes: 18KG

NITOFLO® N

Highly chemically resistant novolac epoxy clear binder producing various coating and topping systems.

Typical Applications

Mining processing areas, chemical plant floors, chemical plant bunding, industrial plant floors.

Sizes: 15L Base, 10L Hardener

NITOFLO[®]R SICALTOP

Floor hardener, silicon carbide/alumina additive dry shake on applied to fresh concrete to improve durability and impact resistance.

Typical Applications

Warehouse floors, loading bays, trucking lanes repair workshop floors, machine shop floors.

Sizes: 20KG

NITOFLO[®]R FC100

General purpose, solvent-based, UV stable acrylic sealer applied to concrete floors to dustproof, make surface more easily cleaned and provide resistance to oils and other liquids.

Typical Applications

Warehouse floors, residential driveways, commercial carparks, light industrial floors, repair workshop floors, machine shop floors.

Sizes: 20L

NITOFLOR® FC120HB

UV stable, fuel-resistant, chlorinated rubber coating applied to protect trafficable concrete floors.

Typical Applications

Light industrial floors, driveways, car parks, parking stations, stairs, petrol stations.

Sizes: 20L

NITOFLOR® FC130

Chemically resistant, water-based epoxy coating applied to concrete floors and walls to dustproof, make surface more easily cleaned and provide resistance to oils and other liquids.

Typical Applications

Warehouse floors, garage floors, light industrial floors, food production floors, kitchens.

Sizes: 3L Base, 13L Hardener

NITOFLO[®] HD

Clear liquid applied to concrete floors to harden, densify and dustproof particularly polished concrete surfaces.

Typical Applications

Supermarket floors, retail floors, commercial floors, building foyers, warehouse floors.

Sizes: 5L, 20L

NITOFLO[®] HD-S

Clear liquid used in-conjunctions with Nitoflor[®] HD to seal and provide a defined sheen level.

Typical Applications

Supermarket floors, retail floors, commercial floors, building foyers, warehouse floors.

Sizes: 5L, 20L

CEMTOP® XD

Internal trafficable cementitious floor topping and wearing surface (6-12mm thickness). Batch Colour available. Min order requirement

Typical Applications

Warehouse floors, residential garage floors, light industrial floors, workshop floors.

Sizes: 15KG

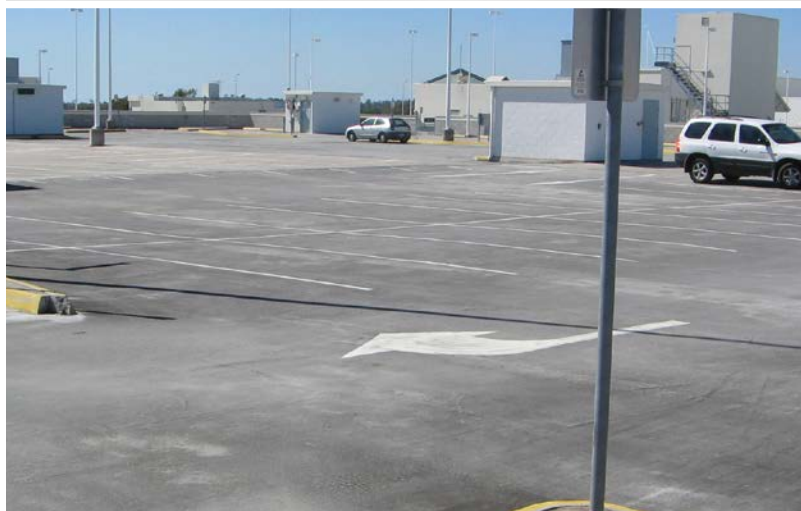

AEGIS® MSP

Internal and external trafficable, cementitious floor topping applied to concrete floors to provide a strong durable surface. Aegis® MSP is particularly suited to repair rain-damaged concrete surfaces.

Typical Applications

Warehouse floors, residential driveways, commercial car parks.

Sizes: 20KG Pack
